Clear Lake Events

- SEVERAL WORK WEEKENDS

EVENTS & ACTIVITIES

YSC 70th Anniversary Party

When: Possibly September, 2021

What: Black Tie, 3-course dinner, Live Band

Where: Elks Club by Union Square in SF

Questions?

TAHOE UPDATE

- Covid Winter and Summer, but the property was still a success in the pandemic.
- Interior Painted, Thanks Thomas Lundbaek
- New mattresses in whole cabin, updated quilts.
- Neighbor incident results in an expulsion and 1 year suspension
- Downed trees split for our fireplace!! Wood for at least another season.
- Jesper suggests going with natural gas stove once our wood is burned to help decrease smoke pollution in Tahoe basin
- New Roof Needed and is scheduled to be replaced Spring 2021
- New Kitchen Sink
- Bear box destroyed by snow plow 3/2020; new box and platform rebuilt

LEAVE NO FOOD - TAKE OUT TRASH - DRIVE SLOWLY - RESPECT
NEIGHBORS

TAHOE UPDATE

Questions?

 - New Ping Pong Table!
 - Irrigation pump and sprinkler replacement
 - Dock stabilization & painted gangway
- 11 Full Cabin Rentals
- No major property system issues

CLEARLAKE UPDATE

Work Weekends

FLOATING TIKI BAR
CONCEPT

CLEARLAKE IN THE FALL

CLEARLAKE RENOVATION PROPOSAL

The Situation

- Underperforms from a Financial POV
- Can only be realistically rented during the summer
- Sit's vacant for more than half of the year

What to do with the property

1. Sell and invest in a new property
2. Do general repairs to improve the property
3. Convert the property into a year-round use

CLEARLAKE RENOVATION PROPOSAL

Option 1: Sell the property

Pros	Cons
- Opportunity to get something closer to the bay area, which might increase year-round utilization - Would eliminate the current losses (negative cash flow situation) for Clearlake Cabin, but could not guarantee positive cash flow in new property	- Difficulty in finding a suitable property - Significant increase in property taxes - Clearlake property is unique: large waterfront footage similar to Clearlake with privacy and good neighbors will be hard to find - Nostalgia factor of losing a property that has been part of the club

Option 2: General upkeep and fixes

Pros	Cons
- General upkeep would improve the experience and hopefully help to maintain property value - Future re-opening of Koncti Resort and entertainment venue may drive more attendance at Clearlake Cabin, but cannot be guaranteed	- Does not increase revenue opportunity to year-round - Many YSC members have become more discerning and do not visit the Clearlake Cabin because it is run down - Uncertainties about COVID are still lingering and our ability to throw large events in 2021 is unknown

CLEARLAKE RENOVATION PROPOSAL

Option 3: Convert cabin into year-round usage.

Pros	Cons
- Increased usage (more than 2X potential) - Increased revenue stream - Upgraded kitchen and indoor facilities more appealing to members - Ability to host small COVID-friendly gatherings year-round - Increases our property value	- Expenses of upgrades - Time and effort from the Clearlake committee - Renovations may interfere with rentals, depending on timelines

Verdict: Board Votes in favor of Option 3

After reviewing the options and drawing up initial plans, the Clearlake Committee recommends option 3. We feel it is in the Club's long-term best interest to invest in the Clearlake property and convert it into a year-round facility. As per our Club's purpose, this improves the utility and enjoyment on behalf of our membership, which is our primary goal. A secondary benefit is the preservation and utilization of an existing asset. While the idea of starting over in a new location is appealing, we feel that there are more downsides than upsides. In addition, we believe that carrying on with the existing status quo will see continued degradation of the facilities and continued drop-off in attendance and revenue.

CLEARLAKE RENOVATION PROPOSAL

Proposed Recommendation:

Option 3: Convert Clearlake Cabin into year-round usage with upgraded indoor and outdoor facilities

- 1. Improve Kitchen and Living Room Area**
- 2. Create Indoor sleeping spaces for up to 6 people**
- 3. Enclose area at the back of the cabin for Freezer and overflow Refrigerator**

CLEARLAKE RENOVATION PROPOSAL

1. Improve Kitchen and Living Room Area

- a. Replace kitchen cabinets with stainless steel (will survive the inevitable flood that will happen at some point)
- b. Install floating cabinets for storage
- c. Upgrade microwave and wall oven
- d. Replace kitchen tile floor with epoxy
- e. New countertops above cabinetry
- f. Replace living room flooring with new vinyl wood strip flooring
- g. Inspect fireplace chimney and flue
- h. Remove water damaged drywall and replace with waterproofed wainscotting
- i. Repair siding on the exterior where water damage and dry rot has occurred

CLEARLAKE RENOVATION PROPOSAL

2. Create indoor sleeping spaces - (for the Winter season. Beds would be put away for the Summer Season)

- a. Repaint Cabin Master's room, women's changing room, and storage room
- b. Move appliances out of the storage room into an enclosed space at the back of the cabin near the entrance to the men's bathroom
- c. Put basic furniture (folding beds, simple dresser, and rug) in existing Cabin Master's cabin, storage room, and women's changing room to create indoor sleeping areas for the winter season.

CLEARLAKE RENOVATION PROPOSAL

3. Enclose area at the back of the cabin for Freezer and Overflow Refrigerator

- a. Build cement retaining wall at the back of the property
- b. Enclose the space using pressure-treated ply
- c. Wooden roof to match existing back of building with skylight for additional light
- d. Move the large freezer and refrigerator to the back of the Cabin to be nearer the kitchen and free up space for sleeping areas.

CLEARLAKE PROPOSED PHASES

Proposed Sequencing:

Phase 1	Phase 2	Phase 3	Phase 4
Repair/replace interior and exterior walls. Add wainscoting where indicated. Move freezer and overflow refrigerator into the area at the back Paint Cabin Master's cabin, women's changing room, and storage room, Living room.	Enclose area at the back of the Cabin near the men's restroom. Repair roof and build retaining wall to protect back kitchen area from rockwall debris. Add skylight in back kitchen area. Update electrical outlets and drainage in back kitchen area.	Demo and dispose of existing kitchen and flooring throughout cabin. Remove the existing kitchen tile from floor and resurface concrete with slip-proof epoxy. Build a pony wall for cabinets in kitchen. Install new kitchen cabinets and countertops. Install new appliance. Install new vinyl wood strip flooring throughout cabin.	Demo fireplace hearth and mantel tile. Install new fireplace tile and apply donation tile plaques. Service Fireplace.
Budget: \$10,000-15,000	Budget: \$5810-\$6,685	Budget: \$25,000-\$30,000	Budget: \$3,300-\$4,000

CLEARLAKE RENOVATION PROGRESS

Progress Report:

”Best guess this was largely due to the flood of 1980 and the decay had slowly developed over the interceding years to the point where it was difficult to see just what was holding the roof up. It was further compounded by the complete lack of plywood and tar paper under the siding; when we opened it up there was just rotten studs and insulation underneath and also the fact that there was no guttering to direct the rainwater away. It was in short a horrible week of demolition, construction and also a serious health and injury hazard.” - Dave Conry

ISSUES DISCOVERED	ACTIONS TAKEN
- Black Mold - Rotting studs and plate - Critter infestation in insulation - Crumbling interior walls - Poor electrical layout and wiring issues - Decaying exterior siding	- Removed and replaced all exterior siding with pressure treated plywood , tyveced and clad with hardie board - Replaced studs with pressure treated wood - Replaced the plate with a 4” pressure treated wood - Replaced framing around windows - New insulation - New electrical boxes placed - Moved all storage equipment, shelving and appliances to new designated locations

CLEARLAKE BEAUTIFUL MOMENTS

CLEARLAKE RENOVATION PROGRESS

What's left in Phase 1:

- Finish electrical outlet wiring
- Inspect interior walls for black mold and add new sheetrock
- Remove Cabin Master built in cabinet
- Rehang all interior doors
- Apply wainscott, trim and baseboards
- Paint bedrooms and womens changing room
- Hang new ceiling fans
